DATA SHEET

DESCRIPTION

The capacity of the GEMC-Series control panels may be expanded through the use of a **GEMC-EZM8** Zone Expansion Module. Each GEMC-EZM8 module provides up to 8 additional zones, and may be configured to provide for either 4 zones or 8 zones. Using either configuration, several GEMC-EZM8 modules may be combined as necessary to supply the required number of zones to the GEMC-Series control panel. Refer to the GEMC-Series control panel installation instructions (WI1653) for wiring requirements.

WIRING

Wire the expansion zones to the module and the module to the control panel in accordance with the wiring diagrams shown using 12-22AWG wire (see WI1653 for maximum wire length depending on wire gauge and current load of home run). Install end-of-line resistors on all zones, even if one or more zones are not used. **NOTE:** The addition of Zone Expansion Modules will reduce the amount of current available by 60mA at the control panel's Auxiliary Power Output terminals.
