

# // BC SERIES

The BC Series connector is a 1-Piece design, featuring all nickel plated contacts and a standard nickel chrome shell. Offering similar functionality to the ST Series, the BC Series enables integrators to spec Planet Waves into large residential or commercial projects where price demands aggressive. This connector sacrifices little in terms of performance while still offering all the incredible benefits of the Planet Waves system.

- Nickel-plated contacts
- Standard nickel chrome finish
- Quality connectivity at a more affordable price
