

Planet Waves System Connection...

Three products designed to solve real world problems for the Electronic Systems Contractor. Planet Waves, known for its innovative cable and HDMI solutions has changed the process of speaker wire termination for the industry. Additionally a unique connector to eliminate Y cables as well as our Matrix Plugs that simplify wiring hook-up to many of today's most commonly available Matrix Audio Switchers.

// BANANA PLUG

The Planet Waves Banana Plug, a revolution to speaker wire termination as we know it. No Stripping! No twisting! Connection via the gold plated pin is direct to the banana plug. The connection pin inserts into the speaker wire and enables complete 360 degree contact with the wire while it is maintained within its jacket, virtually eliminating oxidation over time. Our Patented screw cuts the jacket and holds the wire securely in place and will not loosen. Gold Plated, fully tested for superior signal transfer, shallow depth, better wire management. SPEED, TIME, EFFICIENCY, QUALITY, ALL IN ONE CONNECTION

// MATRIX PLUG

The Planet Waves Matrix Plug is a long-awaited solution to the time consuming task of hooking up and wiring some of today's most popular Matrix switchers and Phoenix 5T connections. The Matrix plug is the combination of Planet Waves' award winning termination system mated to a Phoenix 5T connector. This new plug allows two Planet Waves cables to be terminated quickly and easily to either of the two pre-determined polarity configurations, plug versions "A" or version "C". The Matrix Plug was designed to provide ease of hook-up, time savings, and clean installations when wiring any input or output to a Matrix Audio Switcher or device utilizing a Phoenix 5T connector for unbalanced analog audio input or output. Matrix Switchers from AMX typically utilize both versions A & C. Creston and Extron equipment typically utilize version C. Refer to your particular device to select the correct Matrix Plug for each application.
