

TruPortal™ Access Control

2-Door Base System

OVERVIEW

Designed for small- to medium-sized commercial applications, TruPortal is an IP appliance-based access control system that is integrated with TruVision® video recorders and camera solutions. The browser-based interface makes TruPortal easy to install and easy to use and does not require specialized training, additional software or licensing. With the TruVision Mobile application for iOS® and Android™ platforms, users can remotely monitor system and perform administrative tasks, such as adding or deleting users. Plus, mobile users can perform the most common command and control functions including viewing of real-time or play-back video and generating reports and door commands directly from their phone.

A user-friendly interface, online help files, built-in tool tips, intuitive searching and flexible reporting methods ensure a user-friendly experience. Analog and IP video is provided via integration with TruVision recorders allowing for in-browser video verification and alarm tagging.

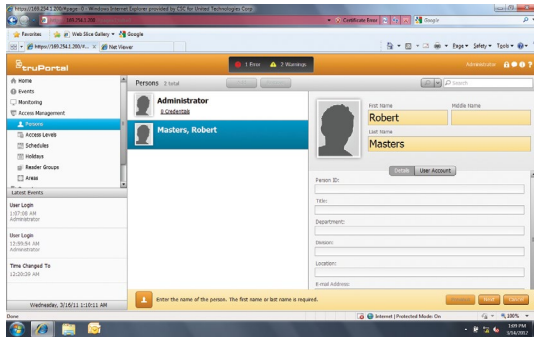

End-user administration of the system is made easy with built-in wizards that guide the administrator through the setup screens, as well as items like Access Levels, Schedules, Holidays and Reader Groups. Multiple levels of permissions can be configured.
