

SP18CAT120 Quick Start Guide

The 3rd Party control can send RS232 or IR through the RX to control the display

- The SP18CT120 is a HDMI 2.0b (18Gbps) 4K splitter that takes one input and splits it to 8 category cable outputs capable to transmitting up to 120m at 4K and 150m at 1080p
- The SP18CAT120 powers the RX devices
- The SP18CAT120 has a COAX and Phoenix connector audio breakout at the TX
- The SP18CAT120 can transmit IR from the RX/Display end back to the TX for source control (not illustrated) as well as send RS232 and IR to the display
