SP14S Quick Start Guide

- The SP14S is a HDMI 2.0b (18Gbps) 4K splitter that takes one input and splits it to 4 scaling outputs each display get the correct resolution
- The SP14S scales on each output for ease of installation when mixing display resolutions
- In addition, the SP14S has an audio breakout (Optical and 3.5mm)
- The SP14S can be used for a myriad of things including; scaling, splitting, EDID fix, and audio breakout
